Visiting Professor
Headache Group of the Society of Neurology, Psychiatry and Neurosurgery of Chile
August 2012

Dr Nelson Barrientos

The Course of Medicine Headache: an Update was held from 27 August to 1 September 2012 at Diego Portales University Auditorium, Santiago, Chile, in the mornings.

Sixty-three young neurologists participated in the classes and workshops. There were presentations and interactive workshops on the ICHD-II, migraine pathophysiology, episodic migraine, chronic daily headache, chronic migraine, headache medication overuse, cluster headache, tension-type headache, organic headache, menstrual migraine, migraine in pregnancy and lactation, paediatric headache and 10 headache cases to discuss. The delegates were very happy with the format of the course, especially the interactive sessions which created a true learning environment.

The participation of Dr Alan Rapoport was very important to the University and our Neurology Society, and Dr Rapoport gave an interview to the main newspaper of Chile where he praised the organisation and planning of the event. The Chilean neurologists also thought the course was a success.
