Email address	alighabeli@yahoo.com

Scholarship

Dates of scholarship	2016
Institution name	Hull Royal Infirmary, Hull York Medical School
Mentor name	Dr. Fayyaz Ahmed

Comments

<p>Short summary of overall experience, including attendance at EHMTIC</p> <p>Generally, this stay was very fruitful for me. In a completely different culture and ambient, I experienced a different medical practice system in UK. I have attended headache clinics, Botox and nerve block clinics for headache patients with Dr. Ahmed. I worked with a headache nurse Vicky who was very helpful and it was a very efficient system for management of headache patients in Hull Royal Infirmary. I had a chance to participate in many research projects with Dr. Alina Buture, my best friend and headache fellowship in Hull. We have sent several abstracts for IHS congress in Vancouver and many upcoming publications from these researches. This course motivated me to pursue my career in headache medicine and educate other health professionals in my country to join the headache care system. During this period, I participated in two headache conference including third European International Headache Academy (iHEAD) in London and 7th British Association for the Study of Headache (BASH) biannual meeting in Hull.</p>

How will the experience help you in the future?

This fellowship had a great scientific outcome for me. When I started my career as a neurologist in Iran, I found out that many problems exist in proper diagnosis and management of headache patients and this fellowship helped me to focus in better diagnosis and management of headache patients. I proposed to start a headache clinic in our hospital and I have new ideas to pursue in future.

I believe that the short term IHS fellowship was an important part of my education giving valuable experience in headache medicine practice and research.

Please include 3–5 photos/images of your stay
