MASTER OF HEADACHE DISORDERS
MASTER OF HEADACHE DISORDERS

BECOME A HEADACHE SPECIALIST
The demand for highly qualified experts in headache disorder is increasing worldwide. To meet this demand, the University of Copenhagen and the Danish Headache Center have developed the Master of Headache Disorders to educate headache specialists. We welcome new applicants for the 2018-2020 intake.

The Master of Headache Disorders will provide healthcare professionals with a solid scientific and clinical expertise in headache treatment and an opportunity to further develop their knowledge, skills and competences in the diagnosis, treatment, and management of headache disorders.

WORLD-CLASS SCIENTISTS AND PRACTITIONERS
The programme offers a faculty consisting of well-known and respected international headache specialists, who excel in teaching headache medicine. The faculty is a unique mix of top and high profile experts with a broad background in the area in order to cover every aspect of headache science.

PROGRAMME LAYOUT
The Master of Headache Disorders is a two year part time programme designed to suit students with a full time job.

1. semester
- Course 1: Epidemiology and Diagnosis of Headache and Facial Pain: 7.5 ECTS
- Course 2: Mechanisms and Comorbidities of Headache and Facial Pain: 7.5 ECTS

2. semester
- Course 3: Investigations and Management of Headache and Facial Pain: 7.5 ECTS
- Course 4: Organization of Headache Care and Clinical Practice: 7.5 ECTS

3. semester
- Course 5: Clinical Course at a Specialized Headache Center 10 ECTS

4. semester
- Course 6: Master’s project 20 ECTS

“I can’t actually put into words how great this program is. It is extremely well structured and it is so unique in its breadth and depth of the subjects that it covers”

- Carl Göbel, Neurologist at the department for Neurology at University Hospital Lübeck, Germany
CLINICAL, E-LEARNING AND FACE-TO-FACE LEARNING METHODS

The programme uses a variety of learning methods designed to provide students with the optimal learning environment. The first four modules are blended learning courses, combining an e-learning module with a week of intensive on-campus study. As a part of the programme the student will participate in three weeks of clinical education with case presentations and best practices at the Danish Headache Center.

“I love the group discussions that we have, because I feel they give us the opportunity to reflect over the topics of the day and thereby translate the knowledge into clinical practice”

- Susie Lagrata, Headache nurse at The National Hospital for Neurology and Neurosurgery, United Kingdom
WHO CAN BENEFIT FROM THE PROGRAMME
Headache treatment at its best is multidisciplinary. This is evident at modern tertiary headache centers which consist of specialised nurses, doctors, psychologist, psychiatrists, pharmacists, dentists and physiotherapists. The Master of Headache Disorders thus invites applications with the above mentioned degrees and experience in the field of headache medicine to apply for admission.

GRANTS
It is possible to apply for a grant to help cover part of the study fee and the travel costs. Read more on www.mhd.ku.dk

ARE YOU AMBITIOUS WITHIN HEADACHE DISORDERS
Then we hope to see you at the Master of Headache Disorders.
